Nyquist Gen-2 VoIP Wall Baffle Speaker Installation Manual

With the Nyquist Series Gen-2 VoIP Wall Baffle Speaker, there is no need for external amplifiers, traditional intercom wiring, or transformer taps to manually set or adjust. Connect the speaker via Cat5 to a Power-Over-Ethernet (PoE) Switch or PoE Injector, and it is ready to use.

The speaker features an integrated 10 watt power amplifier, a CAN Bus interface, a MEMS digital microphone for superior talkback audio, and a Form C SPDT type 2-amp dry contact relay for controlling/overriding third-party devices like AV sources.

The speaker also allows DHCP deployment for easy installation. You can let your Nyquist server automatically discover and configure your speaker, or you can manually configure it through the speaker's web-based user interface (web UI). The web UI also allows easy updating of firmware and setting of parameters for Digital Signal Processing (DSP). For more information about the web UI, refer to the *Nyquist Gen-2 VoIP Speakers Configuration Manual*.

Speaker Layout

The layout of the speakers should be planned prior to installation. Because wall baffle speakers are designed to project forward, it is best to aim them in the same direction as this provides for both greater coverage and clarity. You can use the building's roof pillars or other available supports for mounting the wall baffles.

In some cases, it may be necessary to mount the wall baffles on opposing walls. In these cases, the speakers will project sound in opposing directions.

HALLWAY - Wall baffle speakers work well with rooms and hallways that are 20' to 60' wide. Layout starts at one end of the hallway or room. The first speaker should be installed 10' from the end of the hallway or room. The next speaker on that wall should be installed 20' from the first speaker. Each additional speaker should be installed 20' apart from the previous one. The first speaker on the opposing wall should be installed 20' from the end of the hallway or room, thereby staggering the speakers. Each additional speaker should be installed 20' apart from the previous one (see **Figure 1**).

Speaker Layout (cont'd)

Figure 2

ROOMS - In most cases, an environment, such as a classroom, requires only a single wall baffle speaker to service the entire room. The final placement of the speaker within the room can vary, but common area locations such as at the head of the room or near the room entrance are typically chosen (see **Figure 2**). Based on the speaker position that has been selected, you can choose between several mounting options (see **Figures 3-6**).

Speaker Installation

Step 1

Select the mounting option from **Figures 3-6** and use the appropriate hardware for gang box mount or wall mount. Bogen provides the screws and the washers for mounting on a standard electrical gang box, but when mounting directly to a wall or other surface, you must supply the appropriate hardware for the specific wall/surface construction type (for example, concrete cinder block, metal beams etc.).

NOTE: Wall baffle speakers should be installed at a height of between 8 and 16 feet from the floor depending upon need.

Tilt Mount

Figure 6

Step 2

When applicable, use the pluggable CAN bus connector to attach one or more NQ-E7020 Digital Call Switch to the Nyquist VoIP Full Duplex Module 820-00071-00 as shown in **Figure 7**.

Figure 7

Step 3

If the CAN bus is to be used, ensure the CAN_H and CAN_L use (Cat 5 10/100) twisted pair cable.

Step 4

To connect a third-party device to the dry contact relay output, do one of the following:

- If the device is looking for a Normally Open contact, connect the device using the NO and COM terminals.
- If the device is looking for a Normally Closed contact, connect the device using the NC and COM terminals

Speaker Installation (cont'd)

Step 5

Use Category 5 or higher Ethernet cable to connect the speaker (Figure 8). The power is supplied by PoE using an 802.3af compliant network switch or PoE injector.

Step 6

To assemble the Wall Baffle Speaker (Figure 9), first align the two notches (A) located at the top of the speaker baffle with the notches (B) at the top of the rear housing. Then, rotate the speaker baffle downward until the two bottom sections (C & D) snap together.

NOTE: Refer to the Nyquist Gen-2 VoIP Speakers Configuration Manual or the Nyquist System Administrator Manual for detailed instructions on how to configure these speakers.

Using the Reset Button

The Reset button (Figure 10) allows you to either reboot the VoIP speaker or to reset the appliance's configuration settings to the factory default settings. For more information about resetting configuration settings, refer to the Nyquist Gen-2 VoIP Speakers Configuration Manual.

Compliance

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference; in which case, the user will be required to correct the interference at his own expense.

Additional Accessories

The Nyquist Gen 2 VoIP Wall Baffle Speaker can be used with the Nyquist Digital Call Switch NQ-E7020. Refer to the *Nyquist Digital Call Switch NQ-E7020 Quick Start Guide*.

Limited Warranty, Exclusion of Certain Damages

The **NQ-S1810WT-G2** is warranted to be free from defects in materials and workmanship for five (5) years from the date of sale to the original purchaser. Any part of the product covered by this warranty that, with normal installation and use, becomes defective (as confirmed by Bogen upon inspection) during the warranty period will be repaired or replaced by Bogen, at Bogen's option, with new or refurbished product, provided the product is shipped insured and prepaid to: Bogen Factory Service Department: 4570 Shelby Air Drive, Suite 11, Memphis, TN 38118, USA. Repaired or replacement product(s) will be returned to you freight prepaid. This warranty does not extend to any of our products that have been subjected to abuse, misuse, improper storage, neglect, accident, improper installation or have been modified or repaired or altered in any manner whatsoever, or where the serial number or date code has been removed or defaced.

THE FOREGOING LIMITED WARRANTY IS BOGEN'S SOLE AND EXCLUSIVE WARRANTY AND THE PURCHASER'S SOLE AND EXCLUSIVE REMEDY. BOGEN MAKES NO OTHER WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED AND EXCLUDED TO THE MAXIMUM EXTENT ALLOWABLE BY LAW. Bogen's liability arising out of the manufacture, sale or supplying of products or their use or disposition, whether based upon warranty, contract, tort or otherwise, shall be limited to the price of the product. **IN NO EVENT SHALL BOGEN BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, LOSS OF DATA OR LOSS OF USE DAMAGES) ARISING OUT OF THE MANUFACTURE, SALE OR SUPPLYING OF PRODUCTS, EVEN IF BOGEN HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR LOSSES.** Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from State to State.

Products that are out of warranty will also be repaired by Bogen Factory Service Department -- same address as above or call 201-934-8500, at owner's expense. Returned products which do not qualify for warranty service, may be repaired or replaced at Bogen's option with a previously repaired or refurbished items. The parts and labor involved in these repairs are warranted for 90 days when repaired by the Bogen Factory Service Department. All parts and labor charges as well as shipping charges will be at the owner's expense.

All returns require a Return Authorization number. For most efficient warranty or repair service, please include a description of the failure.
